All matted prints are processed on traditional emulsion-based photo paper. Some photographs are on metallic paper, they have a glossy finish and metallic appearance that creates images with exceptional visual interest and depth. In addition to delivering rich and vibrant colors, this professional paper offers century-plus image stability. The photographs are then matted in high-quality mats and sealed in an archival, photo safe plastic sleeve.

**Fine Art Giclée Canvas Gallery Wraps** are printed directly onto museum quality canvas material using high quality archival inks. The canvas print is then wrapped around a stretcher frame so that the photo's edges are visible on the sides of the frame. Available in 1 1/2 and 2 1/2 -inch depths. A finishing spray is applied to each piece to protect the surface of the print. All Gallery Wraps are delivered with paper backing, bumpers, and hanging hardware attached. All gallery wraps come in the "standard" wrap method: a portion of the image wrapped around the stretcher frame. If a solid color "border" is preferred, please specify at time of ordering. Custom sizes are available, please contact me for details. Also, see the *Splits, Clusters, and Collages* page for information about a grouping of Canvas Gallery Wraps for your home or office.

## ThinWraps and Softop ThinWraps

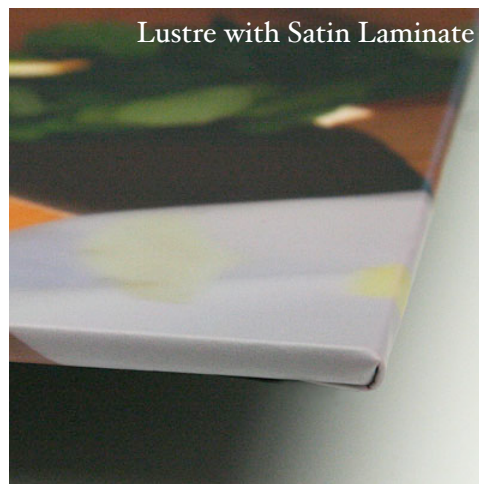

No frame needed, these mounted and finished prints are ready to hang and available in a variety of sizes and styles.

Photographs are printed on your choice of Lustre Paper, Metallic Paper, or Giclée Canvas material. Images are then covered with a soft Satin Laminate or a Glossy Laminate. The resulting product is then mounted on Gatorboard, with or without a foam layer (Softop) in between the print and the board. Some examples of the paper and laminate combinations are shown below. Create a contemporary Thinwrap wall collage; see *Splits, Clusters, and Collages* page.

SoftTop ThinWraps are padded between the print and the mounting board for added dimension. Available with the same Paper Surface and Laminate choices as regular ThinWraps.

Mounting Block is a 1/2" spacer applied to the back of the ThinWrap which allows the image to be hung and appear to float from the wall. ThinWraps can also be ordered with optional Easel Stands if requested (sizes 12x30 and smaller).

# MetalPrints

**MetalPrints™ represent a new art medium for displaying photos by infusing dyes directly into specially coated aluminum sheets.** Because the image is infused into the surface and not on it, your images will take on an almost magical luminescence. Metal Prints are available in 4 different surfaces: High Gloss, Satin, and Sheer with a Glossy or Matte finish.

Colors are vibrant and the luminescence is breathtaking; detail and resolution are unsurpassed. To compliment this unique printing method, there are a variety of modern ways to hang and display your Metal Prints.

All MetalPrints that you order include the Float Mount Blocks that allow

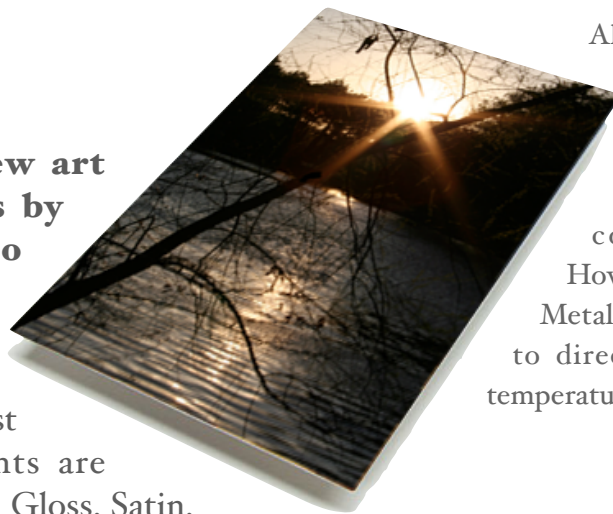

your MetalPrint to “float” ½” off the wall. Additionally, corners can be rounded, scalloped, or left with a

“sharp” point. If you would like something even more dramatic, Creative Edge shapes (shown on

right) are available.

All MetalPrints are coated with a special, ultra-hard scratch-resistant surface that is waterproof/weatherproof and can be cleaned easily with any commercial glass cleaner. However, like any fine art print, MetalPrints should not be exposed to direct sunlight or high outdoor temperatures.
